

Vascular Access Education & Training

"Intravenous therapy knowledge, skills, and attitudes of nurses within a healthcare organization vary greatly... The gap between actual and expected knowledge and skills can be extremely wide, especially in IV therapy."

On-site Peer to Peer Education

Topics available to your staff:

- PICC line care, maintenance, troubleshooting & removal.
- Peripheral IV insertion, maintenance & troubleshooting.
- Successful de-clotting of central vascular access devices.
- Implanted port access, maintenance & troubleshooting.
- Blood sampling from central venous access devices.
- Midline care, maintenance & troubleshooting.

Competency check-off's are available for every class with simulated return demonstration.

IV Therapy Tip of the Month

- Monthly newsletter provided to all participating partners addressing vascular access topics of interest, current data regarding best practice, and important safety considerations regarding vascular access.
- Topics relevant to your practice setting.

Vascular Access Resource

- Vascular access nurses with significant experience and depth of knowledge available to troubleshoot via telephone or in person to prevent Emergency Room visits for malfunctioning vascular access devices.

AIMS Vascular Access maintains high quality standards in accordance with State and Federal guidelines as well as the Infusion Therapy Standards of Practice developed by the Infusion Nurses Society.
